Research Internships

January–May 2020	**Google Brain**, *New York, NY.* **"Avoiding Unhealthy Recommendation Experiences using Safe Reinforcement Learning"** *Research Internship project mentored by **Alex Beutel** (Google Brain).* Formulated a sequential recommendation framework that considers the long-term well being of the users and proposed a novel Safe RL algorithm that provides guarantees for the worst-case users.

May–August 2019	**Microsoft Research**, *Montreal, QC, Canada.* **"Feedback Loops and Producer-side Fairness in Recommender systems"** *Research Internship project working with **Fernando Diaz** (FATE Group).* Studied the intertwined phenomenon of *selection bias* in recommender system feedback loops and *exposure unfairness* for the producers. The goal was to specify the conditions under which these effects amplify and propose algorithms to alleviate them.
May–August 2017	**Facebook**, *Menlo Park, CA.* **"Active Learning for Multilabel Classification for Newsfeed Ranking"** *Research internship project working with **Khalid El-Arini** (Feed Content Classification Team at Facebook Newsfeed).* Developed an active learning approach to optimize for the trade-off between model accuracy and human labeling effort for a large-scale multilabel classification problem on the Facebook newsfeed.
May–August 2016	**Microsoft Research Lab**, *New York City, NY.* **"Contextual Bandits for Personalization of notifications in Microsoft Health"** *Research internship project working with **John Langford** (MSR NYC) and **Ryen White** (Microsoft Health and MSR Redmond).* Developed a *Contextual Bandits*-based approach to personalize reminder and notification messages on the Microsoft Health App to optimize for user's long term health and fitness.
